- Forensic chemistry (3)
- Forensic medicine (4)
- Forensic anthropology (4)
- Forensic genetics I (5)
- Forensic chemistry and toxicology I (3)
- Bioterrorism (4)
- Research work (4)

2nd year (ECTS):

- Role of forensic experts in court proceedings (3)
- Seminar in forensics (3)
- Forensic genetics II (5)
- Forensic chemistry and toxicology II (5)
- Population genetics (5)
- Instrumental methods of analysis (4)
- Mass graves—forensic problem (5)
- Forensic DNA analysis of animal and plant traces (3)
- Microscopy in forensic sciences (3)
- Forensic entomology (3)
- 2 Elective courses (3 + 3)
- Professional practice (10)
- Graduate thesis (10)

REQUIREMENTS: undergraduate/graduate study with at least 180 ECTS credits in the field of: biology, chemistry, biochemistry, pharmacy, biotechnology, marine biology and ecology, chemical engineering and technology, sanitary engineering, medicine, medical chemistry food science, or health-care studies.

FORENSICS AND NATIONAL SECURITIES

COURSES

Ist year (ECTS):

- Scientific methodology and statistics (4)
- Ethics in forensic sciences (4)
- Computer forensics (4)
- Criminal law (4)
- Criminal procedure law I (5)
- Forensic biology (3)
- Forensics and traffic (3)
- Sea and underwater security (3)
- CSI I (5)
- Technologies, intellectual property and information security (3)
- Forensic medicine (4)
- Media and national security (4)
- Forensic genetics I (5)
- Diplomacy and diplomatic communication (3)
- Corporate security (2)
- Research work (4)

2nd year (ECTS):

- Role of forensic experts in court proceedings (3)
- Seminar in forensics (3)
- Criminal procedure law II (4)
- Information and telecommunication systems and security (4)
- International law (4)
- National security systems (5)
- Civil law and civil proceedings (4)
