

# DIGITAL TRANSFORMATION AND AI INTEGRATION AT NAKVIS

NAKVIS has developed an integrated information ecosystem that combines a robust digital infrastructure with artificial intelligence to enhance transparency, efficiency, and strategic intelligence in quality assurance.

## 1 CORE INFRASTRUCTURE: iNAKVIS AND THE PUBLIC PORTAL

The internal iNakvis system serves as the agency's digital backbone, ensuring data integrity, automation, and international compliance. In 2026, NAKVIS launched the NAKVIS Public Portal, offering a user-friendly, real-time access to public records.

### Internal iNAKVIS system

- ✓ Official register of institutions, study programmes and experts
- ✓ Automated workflows and QA procedure management
- ✓ External system integration (e.g. DEQAR)

### Public NAKVIS Portal

- ✓ Dynamic real-time access to public records
- ✓ Statistical insights about Slovenian higher education landscape
- ✓ Transparency and public trust

Explore the NAKVIS Public Portal and learn more

## 2 AI IN QUALITY ASSURANCE PROCESSES

### EVALUATION SUPPORT

- Identification of non-compliance with standards
- Verification of draft reports against official guidelines
- AI-assisted verification of follow-up responses

### ADMINISTRATIVE EFFICIENCY

- Linguistic consistency and terminology alignment
- Automated transcription of council sessions and minutes

### STRATEGIC INTELLIGENCE

- Rapid summarization of international strategic documents (e.g., ENQA, OECD)
- Thematic analyses of expert reports

### RESPONSIBLE AI CONSIDERATIONS

- Human oversight remains essential to AI-generated content
- Data protection and transparency
